User Story

Description : As a customer, user wants to transfer the funds from checking account to savings account.

Acceptance Criteria:
1. User should be able to select from and to account from list of accounts.
2. User should be able to enter amount.
3. Confirmation message post successful transactions.
4. Balance of these accounts should be updated accordingly.

Test Scenarios:

1. Successful fund transfer from checking to savings account
2. Transaction rejected due to invalid amount.
3. Transaction rejected due to insufficient funds.
4. Incomplete transaction due to session timeout.
5. Invalid transaction when user has only one saving or checking account.
6. Transaction failure due to blocked or closed "to"/"destination" account.

Queries :

1. What message should be displayed with transaction fails?
2. Will there be Generic message or based on error like invalid amount, insufficient funds, Invalid account etc.?
3. Will user be able to transfer funds from Savings to Checking account ?
4. What should be the message when user has only one account , savings or checking?
